

STP SOLUPAK

REVOLUTIONARY BIOLOGICAL POWDER THAT OPTIMIZES YOUR SYSTEM PEAK PERFORMANCE

Our unique blend of naturally occurring microbes tackles tough organic matter, ensuring:

High BOD reduction: Break down waste efficiently, meeting even the strictest environmental regulations.

Short hydraulic retention times: Process sewage faster, including a healthy active bioculture and low maintenance needs

Low residual sludge: Minimize sludge build-up for easier tank management and disposal.

All-in-one solution STP Solupak provides everything you need for optimal treatment, eliminating the need for multiple products.

Product eliminate unpleasant smells for a more comfortable onboard environment. Used by leading maritime companies worldwide,

The STP Solupak consortium contains strains resistance to chlorine (from cleaners and sanitizers) up to a concentration of about 20ppm.

STP Solupak is the proven solution for reliable and effective sewage treatment.
