LA 20

**REVOLUTIONARY BIO-BASED
DESCALING TOILET CLEANER FOR
OPTIMAL SANITATION**

LA 20

Supplied in 750ml bottles, LA 20 is a unique bio-based cleaner designed for use in cold water. Our innovative formula combines effective descaling technology with a powerful antimicrobial agent, ensuring:

Comprehensive Cleaning:

Effectively cleans and sanitizes toilets, urinals, showers, and baths, reducing both inorganic and organic scale build-up.

Enhanced Biosecurity:

Contains a widely approved biocide that is effective against bacteria and many common viruses, ensuring a high level of hygiene.

Environmental Safety:

Bio-based and readily biodegradable, LA 20 is safe for the environment and compatible with various materials such as stainless steel, steel, brass, copper, PVC, polyethylene, and polypropylene.

Operational Efficiency:

Low foaming formula ensures maximum efficiency in vacuum toilet systems, reducing maintenance needs and improving overall system performance.

Odor Control:

Helps control malodors, creating a more pleasant onboard environment.

All-in-One Solution: LA 20 provides everything you need for optimal sanitation, eliminating the need for multiple products. Used by leading maritime companies worldwide, LA 20 is the proven solution for reliable and effective toilet and black water system maintenance.
