STP SOLUPAK HT

REVOLUTIONARY BIOLOGICAL
POWDER THAT **OPTIMISES YOUR
SYSTEM PEAK PERFORMANCE**

STP SOLUPAK HT

Supplied in 100g soluble sachets, STP Solupak HT is a highly active natural microbial additive designed for start-up, maintenance, and toxic shock recovery in biological sewage treatment plants and marine sanitation devices. Our unique blend of naturally occurring microbes tackles tough organic matter, ensuring:

High BOD Reduction:

Efficiently breaks down waste, meeting even the strictest environmental regulations.

Short Hydraulic Retention Times:

Processes sewage faster, including a healthy active bioculture and low maintenance needs.

Low Residual Sludge:

Minimizes sludge build-up for easier tank management and disposal.

Odor Control:

Eliminates unpleasant smells for a more comfortable onboard environment.

All-in-One Solution: STP Solupak HT provides everything you need for optimal treatment, eliminating the need for multiple products. Used by leading maritime companies worldwide, STP Solupak HT is the proven solution for reliable and effective sewage treatment.
